Continuation of 5. does NOT place the application in condition for allowance because: The argument that Baba does not disclose the claimed ratio of Pt/Pd which would enable one to simultaneously attain the desired hydrodesulfurization and isomerization in accordance with the present invention is noted. However, the argument is not persuasive because one of skill in the art would modify the process of Baba by using any ratio of Pt/Pd including the claimed ratio. As a result, the modified catalyst of Baba would have similar composition as the claimed composition. It is reminded that the claim is directed to a "composition" and the phrase "hydrodesulfurization and isomerization and simultaneously" is only a statement of ultimate intended utility.
